

Proportion of Males & Females

The proportion of females to males in our workforce has been a consistent 19% female and 81% male year on year since 2018.

Pay Quartiles

There has been an increase in the percentage of females in the lower quartile this year compared to last, indicating that we've attracted slightly more females into entry level roles. Then the percentage of females in the upper quartile has also slightly increased year on year, indicating that our higher paid female workforce is remaining with the company in supervisory or multi-skilled roles.

Hourly Pay Gap (Median & Mean)

This year we have maintained a median gender pay gap of 0.00% for the third year running. Our mean gender pay gap this year is 3.88%, an increase of 0.88% year on year but still lower than the 6.00% mean gender pay gap reported in 2021.

Bonus Pay Gap (Median & Mean)

Our median bonus gender pay gap this year was also 0.00%, an improvement on the 12.00% gap last year. The mean bonus gender pay gap is 36.86%, a decrease from the 44.00% gap reported last year.

Proportion of Males & Females Receiving Bonus Payments

PERCENTAGE RECEIVING BONUS - MALE

PERCENTAGE RECEIVING BONUS - FEMALE

Our figures show that a slightly higher percentage of the females in our workforce received bonus payments this year compared to males, but the difference is only marginal. Both percentages have increased greatly compared to last year when 55.0% of males received bonuses, and just 42.0% of females.

Conclusion

We remain open to attract and develop applicants of any gender both internally and externally. Likewise, we can confidently report that we do not discriminate or apply a different pay grade base on a person's gender. Rates of pay are set regarding the skill set, experience, and requirements of the role. For all hourly paid roles, pay grades are negotiated and set in conjunction with the appropriate recognised Trade Union. All genders are welcome within our business and treated the same in line with company policies, procedures, and training requirements.

Any bonus payments applicable are either based on a contractual requirement or following any 'non-contractual' Company bonus scheme(s). Any bonus schemes introduced are relevant to an employee's role/business requirement and not gender. The company continues to actively recruit more females from all backgrounds and ethnicities into key management roles. We regularly review our policies and processes and systems for monitoring equality within the workplace.

In reporting our findings, these were compiled using Government guidelines. Should you wish to raise a question regarding this report, please direct via email to HROxford@rh-automotive.co.uk.

Thank you
